## SUMMARY

Dedicated Front-End Developer with a strong foundation in HTML5, CSS3, JavaScript, TypeScript, Bootstrap, and Angular. Recently graduated in Agriculture, I bring a blend of technical proficiency and creative problem-solving skills. With a track record in project management, I am adept at fostering collaborative environments for seamless teamwork. Eager to apply my skills and contribute to innovative web development projects.

## SKILLS

### PROGRAMMING LANGUAGES:

- HTML 5/CSS3
- Typescript
- Javascript

### WEB TECHNOLOGIES:

- Angular Framework
- Bootstrap Framework
- Angular Material

### VERSION CONTROL:

- Git
- GitHub

### OTHER TOOLS:

- Angular CLI
- npm(Node Package Manager)
- webpack
- RXJS( Reactive Extension For JavaScript)

## PROJECTS

### 1.Movie Review & Rating Website

Description:

- I Developed a dynamic movie review and rating website that allows users to explore trending, popular, and in-theatre movies.
- Users can view movie details, ratings, and reviews.
- This platform also enables users to register, log in, and submit their own reviews and ratings for movies.
- Integrated Firebase Authentication for secure user logins and registration, enhancing the website's personalized features.

Tech Used:

- Frontend Development : HTML, CSS and BOOTSTRAP for a responsive and visually appealing user interface.
- Backend Development : Utilized ANGULAR with TYPESCRIPT for seamless backend development.
- Database Management : Utilized FIREBASE's FIRESTORE for efficient and scalable database management.
- Authentication and Authorization : Enabled secure user authentication and authorization with ANGULARFIRE.

### 2.Wheather App

Description:

- I Developed a Weather App using Angular, providing real-time weather information based on user-inputted city names.
- The interface displays weather conditions, temperature, and additional details such as humidity and wind speed.
- Users can input any city name to access its weather data, making the app more accessible and useful for a global audience

Tech Used:

- Frontend Development : Created an engaging UI with HTML, CSS, and Bootstrap for a  visually appealing user experience.
- Backend Development : ANGULAR & TYPESCRIPT: Power-packed backend with Angular, seamlessly fused with TypeScript.
- Data Retrieval : Utilized RapidAPI, a PUBLIC API, for fetching weather data, ensuring accurate and REAL-TIME information.

## EDUCATION

### Bachelors of Engineering

Paavai Engineering College • 2019–2023

CGPA - 7.4

## EXPERIENCE

### Fresher

As a Fresher skilled in web Development, proficient in HTML, CSS, JavaScript, TypeScript, Bootstrap, and Angular.

## CERTIFICATIONS

### web developement with Angular

UNIQ Technologies • 2023–2024
